

Implementation

Execution

Acceptance and Implementation

Case Manager Responsibilities (SAMM C2..T1.)

1. Establish initial and long-range goals and objectives for execution.
2. Ensure foreign disclosure and international transfer arrangements are approved by the signature of the LOA or agreement.
3. Prepare a master plan (including a plan for case closure).
4. Develop a financial and logistics management plan.
5. Approve plans of execution, scope, and schedule of work.
6. Review and verify funding and program requirements.
7. Integrate the program.
8. Initiate requirements.
9. Ensure that all schedules are accurate and timely.
10. Validate that costs are accurate and billed.
11. Reconcile cases especially during execution.
12. Respond to purchaser, higher headquarters, counterparts, functional activities, and supporting agencies.
13. Initiate working agreements with supporting activities as appropriate.
14. Analyze performance in relation to required performance specifications.
15. Maintain a complete chronological history (significant events and decisions).
16. Provide status, progress, and forecast reports.
17. Ensure all automation records are in agreement.
18. Prepare case for closure.
19. Ensure that case records are retained in accordance with DoD 7000.14-R, Volume 15, Chapter 6. Retention period is 10 years after the date of final closure.

Consolidation
Of
Four Separate
Case Execution
Legacy Systems**

- **Improves Support to International Customers**
- **Improves Quality and Timeliness of Information**
- **Standardization**
- **Integration**
- **Allows continuous Business Process Reengineering (BPR)**

Source: [http://www.dsca.osd.mil/sc_conf_2002/CEMIS%20\(Freda%20Lodge\).ppt](http://www.dsca.osd.mil/sc_conf_2002/CEMIS%20(Freda%20Lodge).ppt)

Case Execution Management Information System (CEMIS)

Re-Host/Modernize Option

- **Phase One: Re-host**
 - Takes 4 existing legacy systems in current databases and languages:
 - Translates each into C++ or Java on Oracle database.
 - Uses “artificial intelligence” tool vs. manual code translation.
 - Turn off legacy systems.
 - Result: Still 4 separate systems doing same things, but now in one (same) modern language and database.
- **Phase Two: Refactor/Web-Enable**
 - Consolidate the 4 separate systems into one system and web-enable.
 - Eliminate redundant code; choose best business processes among MILDEPs
 - Result: One database for all 3 MILDEPs.
- **Phase Three: Modernize**
 - Add in “Modification” and “New Development” ORD requirements based on affordability and priority.

Security Cooperation Information Portal (SCIP)

- **Concept: Provide timely FMS information to the International Community.
Implemented in Aug-03**
- **The DSCA Portal is:**
 - A short term information solution pending CEMIS development.
 - Providing needed functionality, including a consolidated “Tri-Service” view.
 - Drawing upon information in the current FMS case execution systems (CISIL, MISIL, SAMIS/CMCS, DIFS & DSAMS)
 - Is readily accessible via the Internet.
 - Portal is new technology that allows powerful search engines to pull in *current* data from a variety of sources & display info in a standardized format.

Portal Capabilities

VIEW:

- Country Profile Status
- Case Profile Status
- Case Closure Status
- Line Level Status
- Payment Schedule
- Requisition Status
- SDR Status
- Glossary/Help

Ad Hoc reports:

- Case Status
- Case History
- Line Item
- Payment Schedule
- Requisition

INPUT:

- Requisition Input
- SDR Input
- Follow-ups
- Cancellation Requests
- Modification Requests
- Requisition Batch Uploads
- Requisition Validation.
- Freight Tracking
- Metrics

Definition of a 'Closed Case'

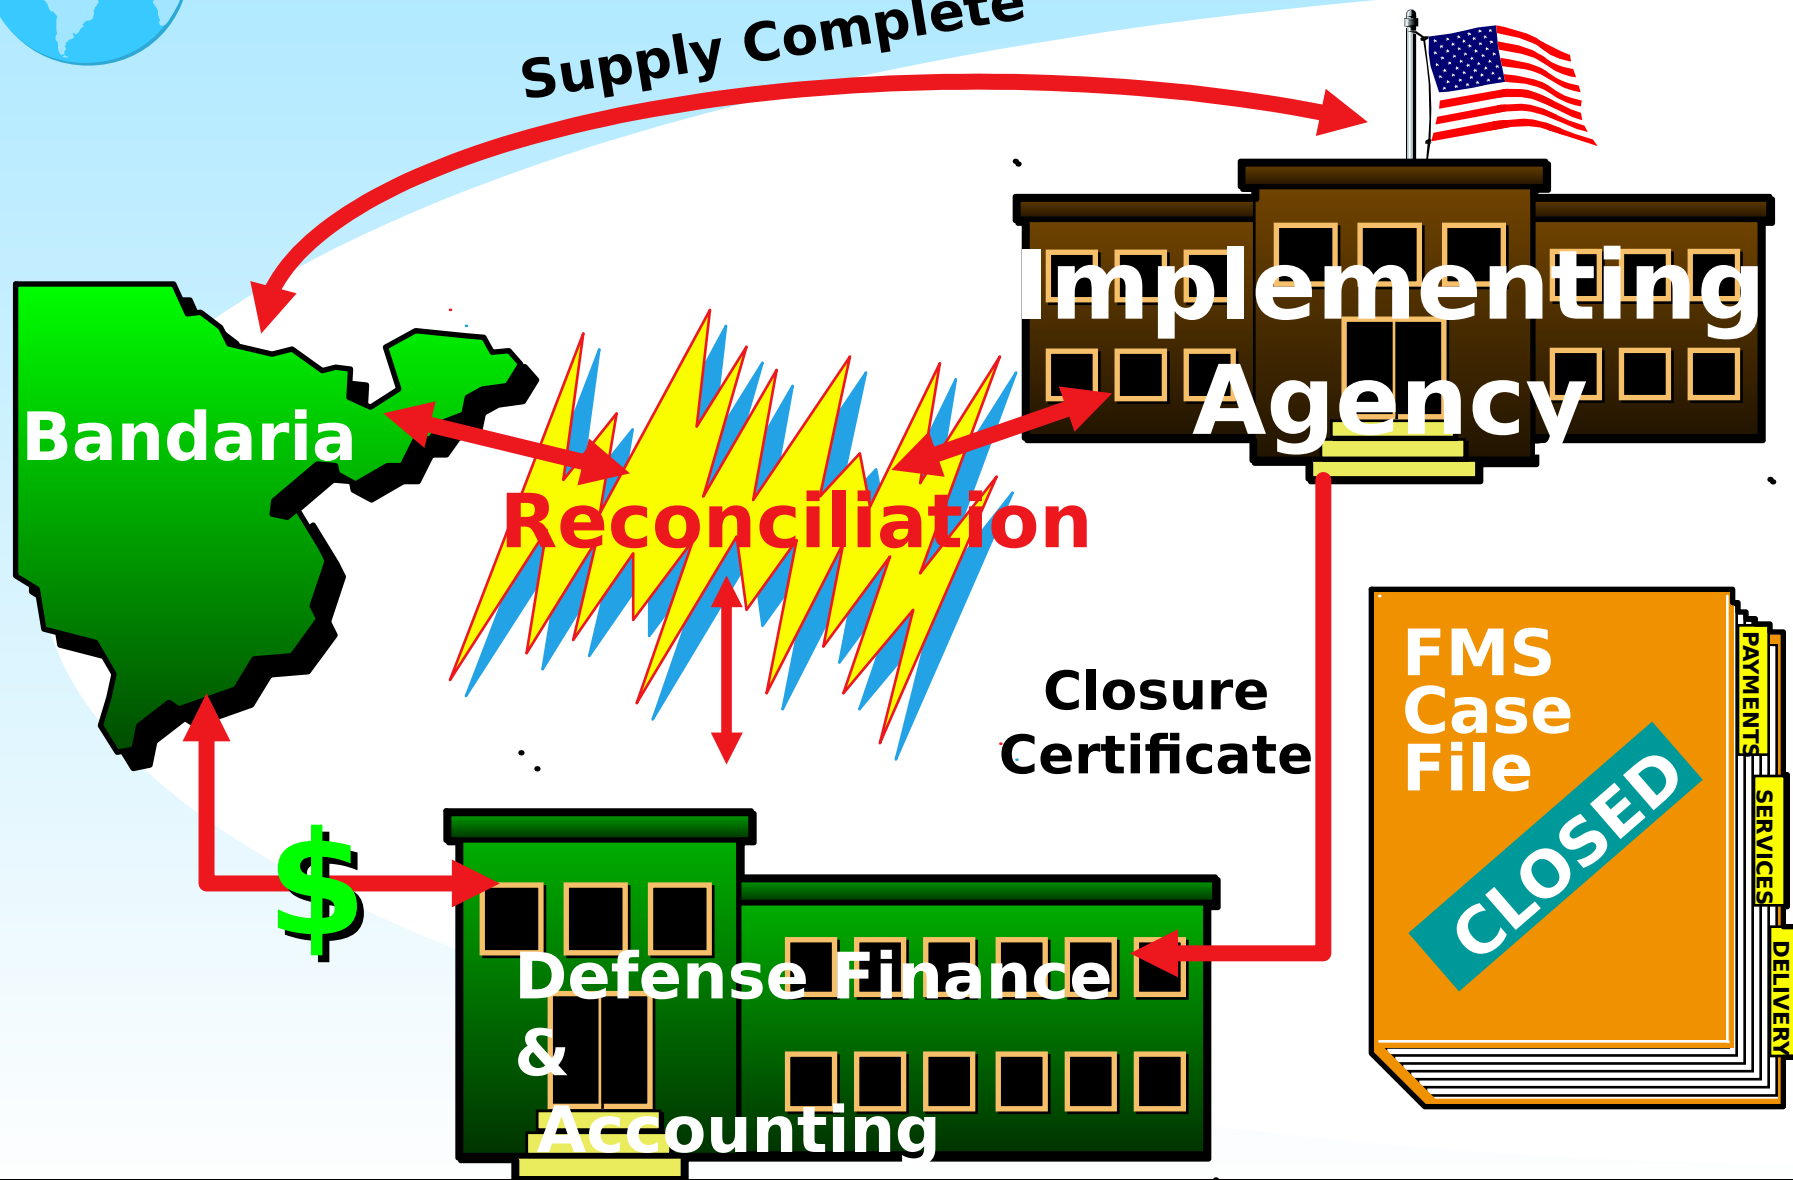

An FMS case on which

- **All material has been delivered**
- **All services have been performed**
- **All financial transaction, including all collections, have been completed**
- **The customer has received a final statement of account**

Case Closure

Supply Complete

Case Closure Inhibitors

- Competing Priorities
- Logistics Reconciliation
- Financial Reconciliation
- Long Running Contracts
- Customer Resistance
- Vague Policy & Procedures
- Low Dollar Value Variances
- Lack of Emphasis
- Personnel Turnover
- Relocations/Consolidations
- Records

INHIBITORS

Case Closure Methods

- **Accelerated Case Closure (ACC) 1992**
 - Cases closed 2 years after “supply complete”
 - Country must agree to participate (FMF countries automatically included)
 - Identify ULO “Unliquidated Obligations”
 - ULO into ACC suspense account
- **Enhanced Accelerated Case Closure (EACC) 1995**
 - DSCA-Close the Case if supply complete > 2 years
- **Force Closure 1997**
 - DSCA- Force close if on EACC list > 3 quarters
- **Non- ACC (Original Methodology)**
 - No new orders, no discrepancies, no open requisitions
 - 100% shipped/billed
 - All contracts must be closed
 - 100% reconciled

Security Assistance Policy & Information
